

Town Of Washington

Project Name: Right of Way & Topographic Survey of Killlearn Road

Addendum #1 to RFP to clarify information.

**Does the Town want the survey performed on the ground or will it consider alternate methods such as mobile scanning, aerial mapping or drone surveying?**

The means and methods for the surveying of Killlearn Road are best determined by the engineering firm so long as all deliverables are completed.

**Will the town be getting wetlands delineated or should that be included in the firm's fee?**

Delineation of wetlands should be included in your fee.
