Re: Comments and Questions - Maps

Dear TOW Comprehensive Plan Review Committee Members,

Thank you for all of the GIS maps.

Please consider supplying the Town with the GIS data files and meta data that goes along with these maps so that in the future the Town could engage a GIS expert whom can work with these maps for what ever projects the Town might need. PDFs are not sufficient for certain types of analytical work.

Thank you for considering these comments.

Very Best,

Howard Schuman
