I Bill Eklund am very happy to have Chris and Simone Mailman as neighbors for over 22 years . They have made many improvements to there property on Woodstock Rd. They are very considerate to all the neighbors. They are great land stewards ,very concerned about the surrounding land and environment . The Mailman's try to step in where needed to assist the Dutchess Land Conservancy movement to prevent to much housing development . Reclaiming old quarry mine sites and changing them back to thriving ecosystem . This Route 82 project is another example of their concern for wildlife . Planting of native grass and building a pond to reclaim the old Peckham mining site while adding habitat for birds, fish and various wildlife. This project will also prevent extra traffic from more housing on Route 82 .In addition prevent the neighbors from having to drill new wells because of 30 new houses tapping into the local aquifer which has already been dropping every year. I feel this project will be an enhancement to the Route 82 neighborhood also preventing over development and the taxing of precious resources.

Thank you for your consideration

William Eklund
