RE: Decommissioning of the Bacon Triangle Solar Facility

To Whom It May Concern:

GreenSpark Solar is an engineering and construction firm with nearly 20 years of experience in wind and solar across the state of New York State and nationally.

We have conducted a review of the decommissioning requirements associated with the Bacon Triangle Solar Facility.

Today, we would be able to perform the decommissioning work for the cost of \$16,254.

Sincerely,

Kevin Schulte
President and CEO

Loyal to People. Loyal to Planet.
