To whom it may concern;

On 10/07/2022, Edward Gerrard, general manager of Orvis Sandanona, inquired as to what would be needed for a building permit application for a 20' x 20' addition to a barn on the Orvis Sandanona property located at 3047 Sharon Turnpike.

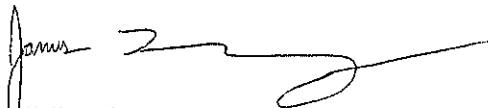

As a builder had not yet been chosen, and several bids involving different architects or engineers were still being sought, no plans have yet been submitted for this planned application.

A preliminary zoning review determined that the proposed addition met all applicable setbacks, is over 141 feet distant from any wetlands, and is not a change of use. However, as a site plan change to a preexisting use shown in Appendix A, it was determined that a Site Plan Review and Approval would be required, unless waived per Section 481(B).

Further details of the proposed construction indicate that this will be a 20' x 20' insulated and sheetrocked wood framed structure on a concrete slab, which will be used as additional workshop space for lathes, tools and workspace associated with existing repairs and gunsmithing.

Per Section 481(B), this letter and attached documentation is a recommendation that the Site Plan Review and Approval be waived in this case of a minor change requiring a Building Permit.

Please let me know if there are any questions, or if any additional information is required.

James

Orvis site plan and proposal for building

Edward Gerrard <gerrarde@orvis.com>

Thu, Oct 13, 2022 at 2:45 PM

To: James Finley <buildinginspector@washingtonny.org>

It is an additional workshop for woodworking, tools ,lathes and gun repairs. Builders were here yesterday and said we should have drawings next week if needed.

Thanks

Ed
