

Town of Washington
Conservation Advisory Commission

Date: January 11, 2025

To: Susan Meaney, TOW Planning Board
Aaron Werner, AKRF
Secretary, Planning Board
From: TOW Conservation Advisory Commission

Re: Clear Application

The CAC is following up on a question raised during the Planning Board meeting held on January 7, 2025, regarding whether the Clear parcels sit in a tertiary aquifer recharge area. As indicated in the CAC letter of October 3, 2024, the map of water resources included in the TOW's 2023 Natural Resources Inventory (NRI)(Map 8) indicates that a significant portion of the Clear property on the north side of Woodstock Road is in a tertiary aquifer recharge area. A copy of Map 8 is available on the TOW website and is attached as a pdf file to this memo. The purple shading is visible on the northwest side of the parcel on the north side of the intersection of Woodstock Road and Stanford Road. Please let us know if you have any further questions.
